Tools	Jira, Azure DevOps, ClickUp, Confluence, Notion
Leadership	Stakeholder and Client Management, Distributed Team Leadership, Mentoring, Negotiation, Conflict Resolution

Work Experience

AHK Solution

Lahore, Pakistan

Sr.Technical Project Manager & Scrum Master

Feb. 2026 – Sep. 2026

- Led a team of **30+ members** and delivered the full agreed project scope approximately two months ahead of the original schedule.
- Introduced AI-assisted development using **Claude Code, Codex and Cursor**, implemented specification-driven practices, and coached engineers on effective adoption.
- Recovered an off-track project within **2–3** months through requirements and gap analysis, priority restructuring with Product and Engineering, and rebuilding sprint goals and backlog structure.
- Owned end-to-end delivery of **SaaS, CRM, web, AI Agents (Chat/Calling) and mobile products** across requirements, development, QA, UAT, release, and post-production support.
- Partnered with Product Owners and Business Analysts to refine scope, acceptance criteria, and priorities, improving backlog quality and requirement clarity.
- Coordinated APIs, integrations, environments, and deployment dependencies with Engineering and DevOps, including third-party vendor access, documentation, and testing readiness.
- Facilitated Scrum ceremonies and managed client communication, demos, change requests, and escalations.

Mavric Systems

Lahore, Pakistan

Technical Project Manager

Nov. 2023 – Feb. 2026

- Managed 4+ concurrent software projects for international clients, maintaining **95%+ on-time delivery** and contributing to **100% client retention.**
- Coordinated distributed Product, Engineering, QA, Design, and Business contributors across 15+ global teams and resources in multiple time zones.
- Led legacy system modernization as Project Manager and Scrum Master, completing the initiative in approximately six months by resolving requirements, backlog quality, and communication bottlenecks and introducing **AI-assisted automations** for requirements and documentation.
- Increased reported sprint velocity from approximately **30–40 story points to 70–80**, eventually reaching around 100 story points per sprint.
- Owned the Product Requirements Document (PRD) process, improving requirement clarity, acceptance criteria, and development readiness.
- Managed an MVP from initiation through launch, converting the initial engagement into a longer-term client relationship.
- Supported **pre-sales** activities through requirement discovery, project scoping, effort estimation, and proposal preparation.
- Strengthened PMO practices by mentoring Project Managers and Coordinators, introducing AI-supported gap analysis, PRD creation, and backlog refinement, and developing guidelines for team **AI adoption.**

Gather Labs Pvt. Ltd.

Lahore, Pakistan

TECHNICAL PROJECT MANAGER

Jan. 2022 – Oct. 2023

- Managed end-to-end delivery of mobile and software initiatives, coordinating requirements, planning, development, QA, release, and post-release activities.
- Coordinated native iOS, Android, backend, QA, and supporting teams across feature development, technical dependencies, testing, and release readiness.
- Worked with stakeholders and technical teams to translate product requirements into prioritized development work, clarify requirements, and manage scope and delivery expectations.
- Participated in technical discussions around APIs, third-party integrations, real-time communication features, data flows, mobile application dependencies, and implementation considerations.
- Coordinated third-party integrations and external dependencies, including requirements, technical documentation, access, testing readiness, and issue resolution with relevant teams and vendors.
- Supported application infrastructure and release coordination across **AWS, GCP, Firebase, and Google Play Console**, working with technical teams on environment and deployment requirements.

Neeopal Software Solutions

PROJECT MANAGER | LARAVEL DEVELOPER

Feb. 2018 – Dec. 2021

- Started as a PHP/Laravel Developer and transitioned into a Project Manager role after approximately 1.5 years.
- Developed an internal Office HRIS system and e-commerce applications using PHP, Laravel, MySQL, Blade Templates, and Bootstrap.
- Built backend functionality, managed database operations using MySQL, and developed responsive web interfaces with Laravel Blade and Bootstrap.
- Coordinated cross-functional teams across mobile applications, backend services, and web platforms, managing requirements from planning through release.
- Worked with clients and product stakeholders to gather requirements, define scope, prioritize features, and manage development backlogs.
- Facilitated Agile ceremonies, including sprint planning, daily stand-ups, backlog refinement, and progress tracking.
- Managed project timelines, dependencies, change requests, testing coordination, and release activities while keeping stakeholders aligned.

Freelance Software Development

Pakistan / Remote

PHP / LARAVEL DEVELOPER

2015 – 2017

- Developed web applications and business solutions using **PHP, Laravel, MySQL, HTML, CSS, and JavaScript**.
- Built and maintained websites, business applications, and custom CRM solutions based on client requirements.
- Worked directly with clients to understand requirements, estimate development work, implement features, troubleshoot issues, and deliver completed solutions.
- Managed development activities across the software lifecycle, including implementation, database development, testing, debugging, deployment, and post-launch support.

Education

Superior University Lahore

Lahore, Pakistan

MASTER IN COMPUTER SCIENCE

Feb. 2016 – Feb. 2018

- Achieved 1st position in the Final Year Project.
